

- 1 At the time specified by your skin care professional, AM  
PM wash the treated area using **Soothing Foamy Cleanser** to completely remove **melanage mini peel Solution**.

*Some patients with more dry or sensitive eyes may experience redness, excess tear production, or other signs of eye irritation while the peel preparation is on the face or for a short time after its removal. Use of an appropriate lubricating eye drop, such as Refresh Plus®, available at most drugstores, is recommended to relieve such symptoms.*

- 2 After gently patting skin dry, apply **Soothing Balm**.

AM

- 3 Cleanse skin with **Soothing Foamy Cleanser**.
- 4 Apply **Soothing Balm** (first 2-3 days as needed)
- 5 Apply **Emollient Facial Sunscreen**.

PM

- 6 The evening of the day following removal of the **mini peel Solution**, cleanse skin with **Soothing Foamy Cleanser**, then apply **melanage 2 Creme**. If excessive redness, itching, peeling or swelling occurs, discontinue use of the **melanage 2 Creme** and use **Soothing Balm** until symptoms subside. In case of swelling, apply cold compresses as needed. Once skin returns to a normal state, treatment with **melanage 2 Creme** can resume.
- 7 After the first week of treatment, continue using **Melanage 2 creme**. For best results, apply nightly. In case of excessive dryness or undue irritation, application may be adjusted to every other night, or as directed. **Intensive Soothing Complex** can be applied morning and/or evening, as needed, to control excessive dryness, and can be used alone or in combination with Sunscreen and **melanage 2 Creme**.
